

QUALITY, ENVIRONMENTAL PROTECTION, EMPLOYEE SAFETY AND HEALTH POLICY OF ENERSTENA GROUP OF COMPANIES

ENERSTENA Group of companies is well known in Lithuania and abroad distinguishing for its development and production of biomass combustion and climate change mitigation technologies. We have been working in the energy market since 2002. During this time, we have developed our own technology, have established the research and development centre, the fuel research laboratory, the engineering solution centre, as well as the companies of design, manufacturing, automation of technological processes, technical service, maintenance and operation. We carry out our projects from the concept to the turnkey.

MISSION:

FOR CLIENTS. We create, produce and implement efficient biomass energy and energy saving systems.

FOR EMPLOYEES. By working together, we create an environment based on responsibility and respect in which we can develop, and we are appreciated as well.

FOR SHAREHOLDERS. Working for ENERSTENA Group, we are constantly striving for steady growth of company value.

FOR SOCIETY. Our contribution to society is to reduce environmental pollution and usage of resources by developing efficient energy production solutions.

PRINCIPLES:

ENERGETICS – to implement projects in the field of energetics.

ECOLOGY – implementing projects to preserve clean environment for future generations.

EFFICIENCY – implementing projects to introduce only the most effective technologies.

STRATEGIC GOALS:

- Become an efficient and environmentally friendly producer;
- Develop new products for target markets based on sustainable bioenergy principles;
- Become Lithuanian trademark of quality and innovation;
- Ensure and continuously improve the quality of produced equipment and services;
- Ensure the risk management of company activities and project implementation;
- Develop competencies and personal responsibility of employees at all levels and promote creative initiative.

DIRECTION OBLIGATIONS:

- Continuously improve the efficiency of the quality, environmental protection and employee safety and health management system;
- Ensure fulfilment of applicable legislative, regulatory and other obligations of the ENERSTENA Group;
- Protect the environment from the potential negative impact of the company activities by assessing and managing significant environmental protection aspects in all under way processes;
- Create attractive working conditions and environment for employees;
- Evaluate and control occupational risks; prevent risks of accidents, incidents and occupational diseases.
